#### **About Us**

#### Gabriela Ramon (Team Head)

**Grade:** Freshman

**Major:** Applied Mathematics

Minor: Data Science and Analytics

**Contact Info:** 

gabriela.ramon1@marist.edu

#### Madison Chan (Team Member)

**Grade:** Sophomore

Major: Business Administration – Marketing

Minor: Graphic Design & Data Science and

Analytics

Contact Info: madison.chan1@marist.edu

#### Project Objective

#### The admin user is capable of:

- Having an admin user and password for login
- Changing the admin user and admin password
- Adding a normal user to TMS by creating a new username and password.
- Remove users from TMS by removing their username, password, and corresponding recorded data.

#### Each user should be able to:

- Add a task to TMS. The task contains: a title, time, duration, and description
- Remove a task
- Edit a task's details
- Search through TMS based on time, title, or duration and list the results on screen.

#### **Project Objective**

#### TMS should be a user-friendly software, such that:

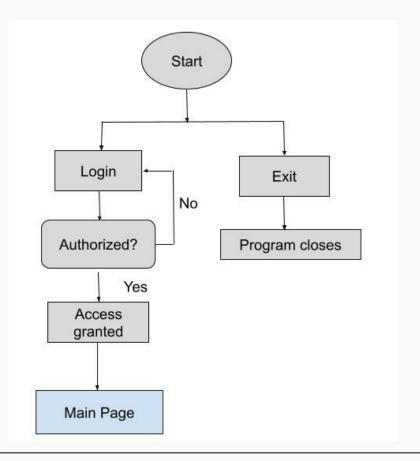

- It shows a welcome page and provides a menu of all functions to the user on all pages
- It illustrates the reports in a tabular form. For instance, it displays a well-organized calendar of every week or month.
- It shows a warning if the user tries to input contact information with a name that exists in the history
- TMS should provide an exit function and thank the user for using this software.

# Graphical User Experience Design

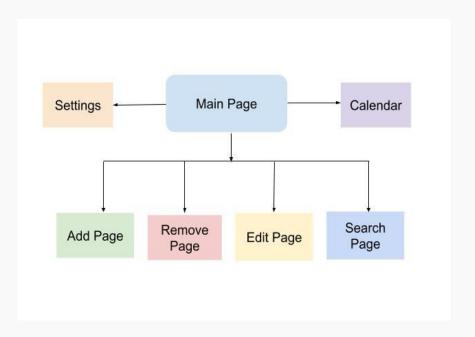

Page Implementation Ideas

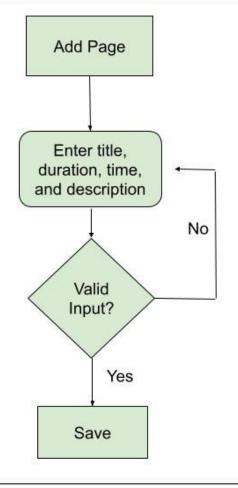

# Login Window

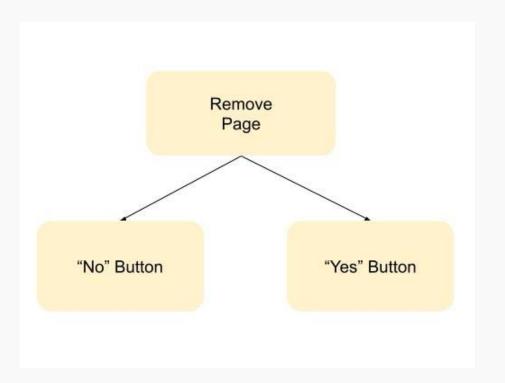

### Main Menu Window

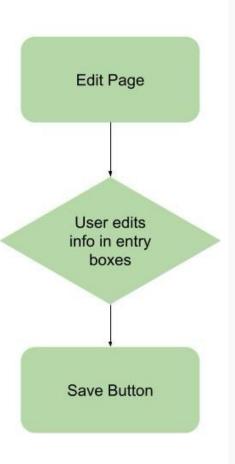

### Add Task Window

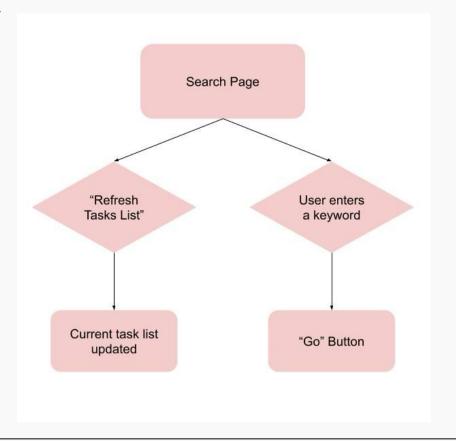

# Remove Task Window

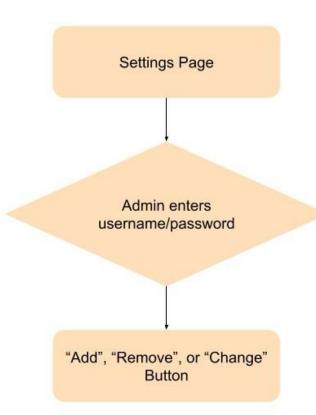

# Edit Task Window

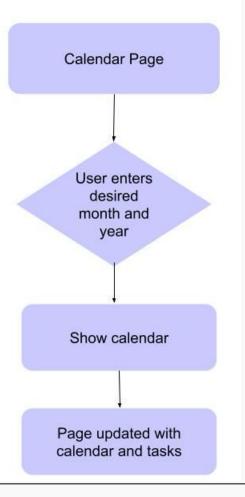

# Search Task Window

# Settings Window

### Calendar Window

#### Virtual Environment

```
C:\Users\ramon>cd Downloads
C:\Users\ramon\Downloads>python -m venv .tms
C:\Users\ramon\Downloads>.tms\Scripts\activate
 .tms) C:\Users\ramon\Downloads>python -m pip list
Package Version
       24.0
(.tms) C:\Users\ramon\Downloads>
```

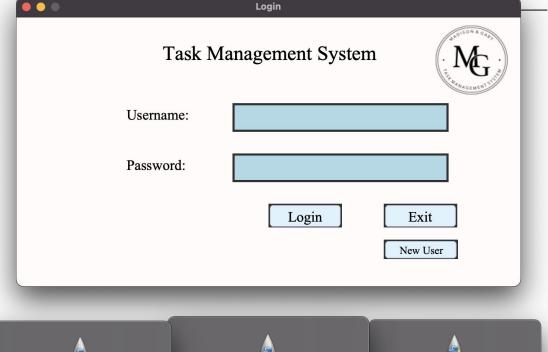

# Graphical User Interface Design

Python Implementation

### Login Window

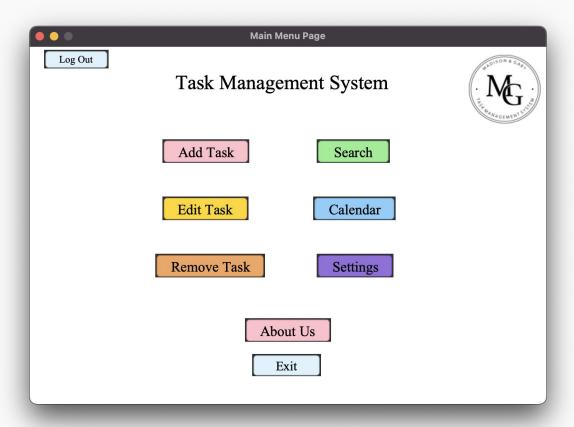

- 2 entry boxes
- 2 buttons
- 3 pop-ups for each buttons completion

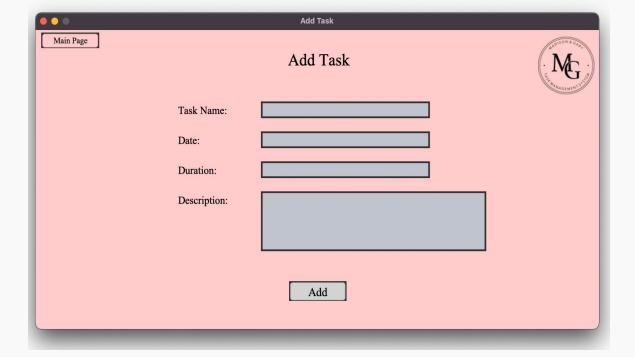

### Main Menu Window

9 buttons

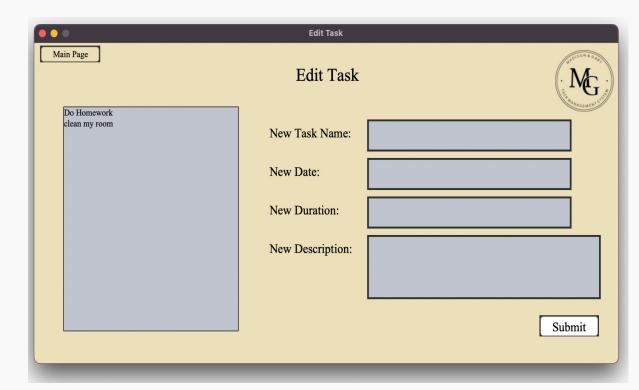

### Add Task Window

- 2 buttons
- 4 entry boxes

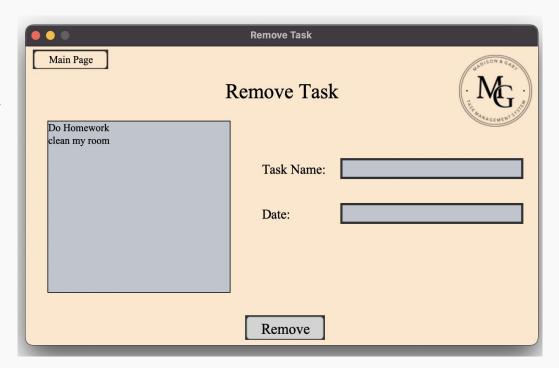

### Edit Task Window

- 2 buttons
- 4 entry boxes
- 1 list box

#### Remove Task Window

- 2 buttons
- 2 entry boxes
- 1 list box

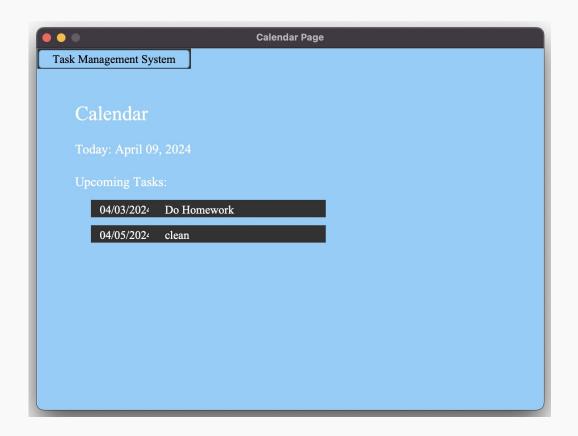

#### Search Task Window

- 3 buttons
- 5 entry boxes
- 1 list box

### Calendar Window

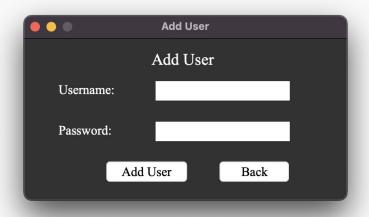

- 1 button
- 2 entry boxes

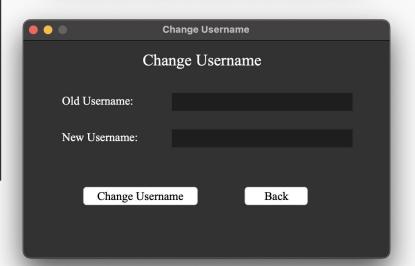

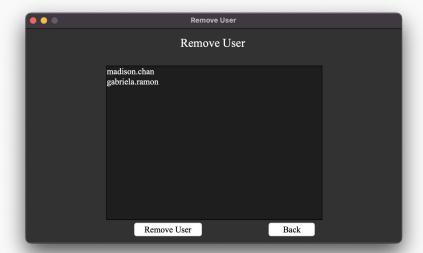

# Settings Window

• 5 buttons

● ● ○ Change Username		
Change Password		
Old Password:		
New Password:		
Change Passwo	ord	Back

#### Data Storage

- "users.csv" file stores all of the usernames and passwords for the program
- {CURRENTUSER}.csv created for each user and stores all their task information

```
fields=['Username', 'Password']
filename='users.csv'
os.chdir('/Users/ramon/Downloads')
with open(filename, 'w') as csvfile:
    csvwriter=csv.writer(csvfile)
    csvwriter.writerow(fields)
    csvwriter.writerows(rows)
```

filename=f'{CURRENTUSER}.csv'
